

UNIFIED FINANCIAL INTELLIGENCE

Financial Consolidation & Reporting, Budgeting, Data Quality, Analysis and More

Excel Global Partners (EGP) is proud to partner with OneStream Software to deliver OneStream XF.

OneStream:

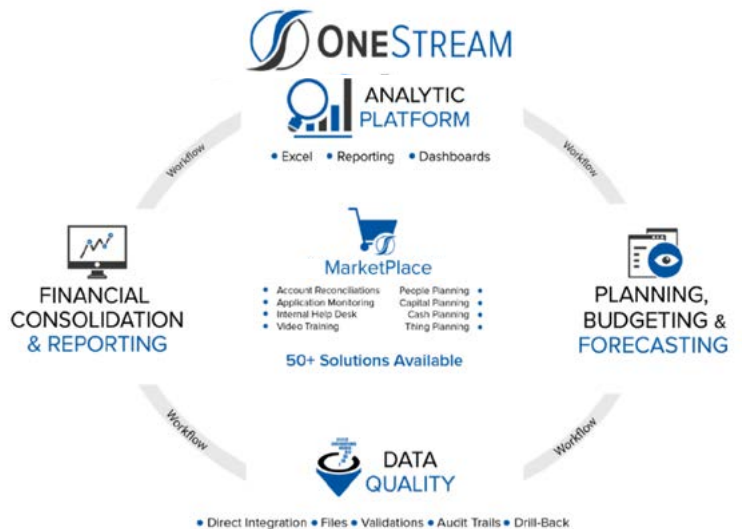

OneStream XF is so much more than just a consolidation and budgeting software. It is a revolutionary product that flexes to collect any structured or unstructured data for analysis and reporting. Lower the cost of deploying these additional solutions such as account reconciliations, profitability and cost management, workforce planning, year-end debt schedules, weekly pulse data, or any other collection imaginable

The Challenge:

Our clients require multiple products, multiple applications, and complex integrations which was time consuming and can lead to inaccuracies. However, clients want better information delivered faster and cheaper. The current CPM status quo offers 16 separate products that all work on different technologies. The burden falls on the customer to install, integrate and maintain all of these products. This disparate strategy is unsustainable and results in: increased administration and IT staff; exotic and expensive hardware; brittle consultant driven integrations; and software install, upgrade and infrastructure paralysis.

The Solution:

OneStream XF offers one product, one application, and multiple solutions all in one. As the original inventors and architects of Oracle® Hyperion Financial Management and Oracle Hyperion FDM/UpStream WebLink®, OneStream started over to engineer the first sustainable platform for Unified Financial Intelligence. OneStream XF combines power and flexibility with ease of use, deployment and maintenance.
