UNIFIED FINANCIAL INTELLIGENCE

Financial Consolidation & Reporting, Budgeting, Data Quality, Analysis and More

Excel Global Partners (EGP) is proud to partner with OneStream Software to deliver OneStream XF.

OneStream:

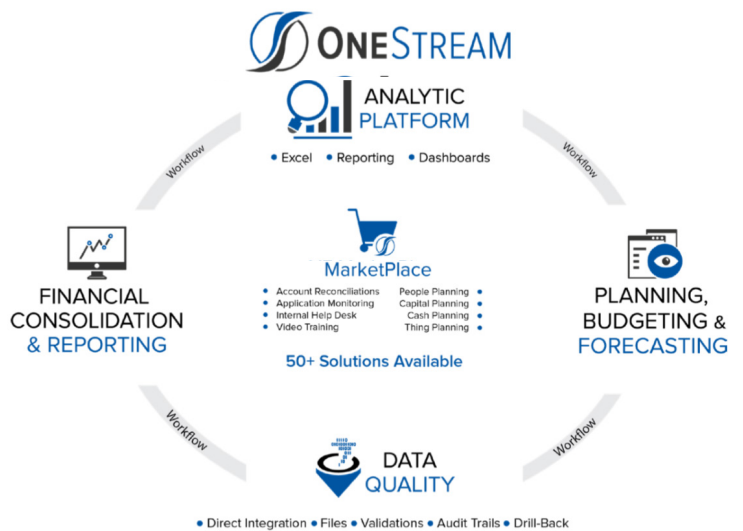

OneStream XF is so much more than just consolidation and budgeting software. It is a revolutionary product that flexes to collect any structured or unstructured data for analysis and reporting. It lowers the cost of deploying additional solutions such as account reconciliations, profitability and cost management, workforce planning, year-end debt schedules, weekly pulse data, or any other data collection imaginable.

The Challenge:

Our clients required multiple products, multiple applications, and complex integrations which were time-consuming and prone to inaccuracies. Moreover, clients wanted better information delivered faster and cheaper. The current CPM status quo offers 16 separate products that all work on different technologies. The burden fell on the customer to install, integrate and maintain all these products. This disparate strategy was unsustainable and resulted in increased administration and IT staff; exotic and expensive hardware; brittle consultant-driven integrations; and software installation, upgrade, and infrastructure paralysis.

The Solution:

OneStream XF offers one product, one application, and multiple solutions, all in one. As the original inventors and architects of Oracle® Hyperion Financial Management and Oracle Hyperion FDM/UpStream WebLink®, OneStream started over to engineer the first sustainable platform for Unified Financial Intelligence. OneStream XF combines power and flexibility with ease of use, deployment, and maintenance.
